Tux, the famous Linux mascot, comes in many shapes and sizes ready for any challenge!
Linux comes in many flavours too, may we interest you in Ubuntu?
Ubuntu is Linux for human beings – easy, free and powerful!

Ubuntu is the most popular Linux among ordinary computer users today with an estimated 6.000.000 users around the world.
Ubuntu is for most people as easy to use as Windows or Mac. It comes preloaded with office programs, graphics tools, sound and video players, games and more.
Thousands of free programs can be downloaded and installed with just a few mouse clicks.
Even hardware support is great, most cameras, printers, mp3-players etc. simply work when you just plug them in.
Ubuntu is easy to maintain, but if you get any problems there are forums where you can ask questions and obtain help.
Many people have discovered the advantages of a free, fun to use and powerful system such as Ubuntu.
You can even run Ubuntu straight from the CD, it can't get any easier than that!
Dare you take the next step and try Ubuntu?
