

how
would
you
like a
safer,
faster
computer
for
free?

download

fire up your poor old PC,
connect to the internet and
visit ubuntu.com/getubuntu

click on the 'download now'
link and then the 'start
download' button

now go make a cuppa – this
may take some time!

if you're on a really slow
connection then you might
want to order a cd instead of
downloading – it's still free!
just visit

ubuntu.com/getubuntu

burn

ok, so you've downloaded
ubuntu to your computer, so
now you need to put it onto
a cd

if you don't know how to do
this, it's ok – we've created
a webpage to help you

it's internet time again!
visit

help.ubuntu.com/community/BurningIsoHowto

install

simply put the cd into your computer and reboot it

select 'install or start ubuntu'

wait for a few minutes...

what loads is a demo of what ubuntu will be like when it's installed (although the demo mode is a lot slower than the real thing)

install ubuntu to your hard drive by double clicking the install icon on the desktop and answering a couple of questions

a little while later it's done!

enjoy

that's it! you have now joined the ranks of people running ubuntu - the world's leading free operating system

now you will want to know how to install programs, play movies, music and games

guess what?

we wrote another webpage for you containing all the information you could ever need!

help.ubuntu.com

why bother?

well, you'll remember that the first page of this leaflet suggested that you could get a safer, faster computer for free - well that's what you now have!

ubuntu doesn't get viruses

ubuntu runs faster and is more stable than windows

ubuntu, and the programs that run on it are free
