Setup Guide: UD Countdown

Table of Contents

Installation.....	3
Configuration.....	5
Configure the Block.....	7
Permissions.....	8

Installation

To install the module, I will assume you already followed the UD Theme installation guide. From the front page click “Administer.”

In the “Site Building” section click “Modules.”

Site building

Control how your site looks and feels.

Blocks

Configure what block content appears in your site's sidebars and other regions.

Menus

Control your site's navigation menu, primary links and secondary links, as well as rename and reorganize menu items.

Modules

Enable or disable add-on modules for your site.

Themes

Change which theme your site uses or allows users to set.

You will then be looking at the modules page.

Scroll down to the bottom of the page to see the “Ubuntu Drupal” group of modules.

▼ Ubuntu Drupal

Enabled	Name	Version	Description
<input type="checkbox"/>	Ubuntu LoCo Map	6.x	Adds a page to list LoCo areas within a country/world.
<input type="checkbox"/>	UD Header		Adds a block that can be used as a header. Offering various options for each node type.
<input type="checkbox"/>	UD Planet		Mimics PlanetPlanet which hosts planet.ubuntu.com. Depends on: Aggregator (disabled)
<input type="checkbox"/>	UD Release Countdown		Adds a countdown block to your site to show when the next version of Ubuntu will be released.
<input type="checkbox"/>	UD Sidebar		Adds a block that mimics the sidebar on ubuntu.com

Select the “UD Release Countdown” module and click “Save Configuration.”

Save configuration

Configuration

Go to the “Administration” page.

Click the “UD Countdown Settings” link.

You will now see the available settings.

Standard Settings

Display Option: *

Custom Code

Option 0 - Stars

Option 1 - Spotlight

Option 2 - Static Image

Which options from the **countdown** collection to use.

Custom Code:

Use this area to create your custom block of code.

Save configuration

Reset to defaults

The defaults will work. If you would like to use the second option, simply select it and click “Save Configuration.”

Standard Settings

Display Option: *

- Custom Code
- Option 0 - Stars
- Option 1 - Spotlight
- Option 2 - Static Image

Which options from the **countdown collection** to use.

Custom Code:

Use this area to create your custom block of code.

Save configuration

Reset to defaults

You will then have a message telling you the settings were applied.

Home > Administer > Site configuration

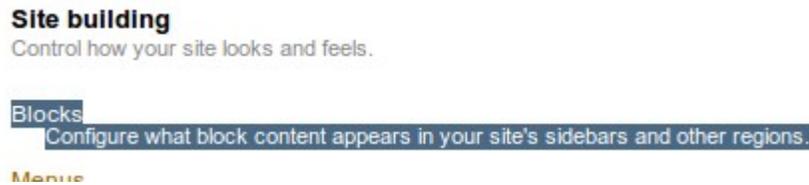

UD COUNTDOWN SETTINGS

The configuration options have been saved.

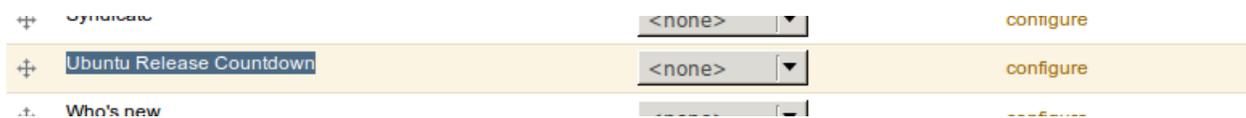

These options are update on a Cron. This is run when you go to [yoursite.com/cron.php](#). Drupal explains how to configure this to run automatically.

Configure the Block

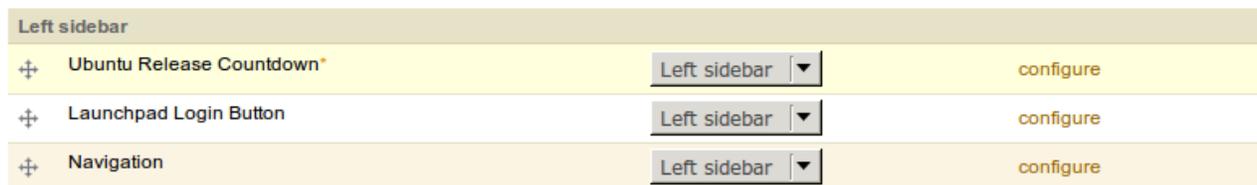

To configure the block so it displays on your site, go to the “Administration” page and click the “Blocks” link in the “Site Building” section.

Find the “Ubuntu Release Countdown” block. Select the drop down box to the right of it that currently says “None” and select a region for it. For the example, we will use the “Left Sidebar” region.

You will see the module was moved into this section (region). You can use the handle to adjust its exact location.

Scroll down to the bottom and click “Save Configuration.” After this saves, go to your front page.

You will now see the block content displayed where you assigned it.

Permissions

This module has permission settings just like any other module. To get to these permissions, go to the “Administration” page and click the “Permissions” link.

User management

Manage your site's users, groups and access to site features.

Access rules

List and create rules to disallow usernames, e-mail addresses, and IP addresses.

Permissions

Determine access to features by selecting permissions for roles.

Roles

List, edit, or add user roles.

User settings

Configure default behavior of users, including registration requirements, e-mails, and user pictures.

Users

List, add, and edit users.

This page is well constructed and well documented in other places. This guide has an example of a basic set of permissions. You can copy these, click “Save Permissions” and tweak as you please.

Permission	anonymous user	authenticated user	administrative user
udcountdown module			
administer udcountdown	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
view udcountdown	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
udheader module			
administer udheader	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
view udheader	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
udplanet module			
administer own feeds	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
administer udplanet	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
view udplanet	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
udsidebar module			
administer udsidebar	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
view udsidebar	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
